

# Feed Me

## Adorable

How things are together we'll destroy  
And then we can destroy what we are  
Together we can build what we are  
When we dream the spirit free  
We don't give praise, we take praise  
So why are we? How things are together we'll destroy  
And then we can destroy what we are  
Together we can build what we are  
When we dream the spirit free  
We don't give praise, we take praise  
So why are we? Feed me when I'm hungry, drink me till I'm dry  
The dream of yesterday becomes another lie  
You feed me lies, distortion, the English disaster  
No one's free, one lord for one master We found a new place to live  
Where we're taught to grow strong  
And strongly sensitive, it always sets the scenery  
Colors leave only beauty  
Words and wine amongst the greenery See how it tastes  
See how it tastes We only let you teach us wrong and right  
Give us priority  
We only let you teach us wrong and right  
Give us priority Extract from crystal though nothing is clear  
I despise you, damn you, dream you, I love you  
But still nothings clear  
I think of when I found you Keep on singing while I'm drowning  
Down into that two tone vision  
I've been raised in this place  
And now concrete is my religion See how it tastes  
See how it tastes  
See how it tastes  
See how it tastes  
See how it tastes We only let you teach us wrong and right  
Give us priority  
We only let you teach us wrong and right  
Give us priority  
We only let you teach us wrong and right  
Give us priority  
We only let you teach us wrong and right  
Give us priority
