

# Sacred Ground

## Sacred Earth

Can you feel her  
Feel her call your name  
Hear the rustle of the leaves  
Feel the blowing of the breeze

She is all around  
She is sacred ground

Feel the blessings on your feet  
Every time they touch the earth  
But I also feel her cry  
And it saddens my heart

This world's going much too fast  
She can't keep up with us  
We need to slow  
Back to the rhythm of the earth

Please remember that she breathes  
Please remember that she breathes  
Ohh just like us, ohh just like us

She needs her air to be clean  
And her forests to be whole  
She needs her water to be clear  
Just like a temple that houses our soul

Please remember that she breathes  
Please remember that she breathes  
Ohh just like us, ohh just like us

Can you feel her  
Feel her calling your name  
Hear the rustle of the leaves  
Feel the blowing of the breeze

She is all around  
She is sacred ground
