

Living Without You (Fielden Club Mix)

[Tulisa](#)

Stars sit in the sky, love's alive
Relationships should never die
My heart beats and it beats just for you
Broken down by the chasing of you I don't know my place
Living without you is a curse that I can't take
I know I've made mistakes
Living without you is a curse that I can't take
Living without your love
Living without your love, drives crazy
So save me, from falling to the depths without no safety
Don't leave me hanging by a thread I don't know my place
Living without you is a curse that I can't take
I know I've made mistakes
Living without you is a curse that I can't take Living like a ghost
Pushing for the antidote
Hoping that I feel alive
'Cause if I don't have you
The words were never true
You've clearly left me blind I don't know my place
Living without you is a curse that I can't take
I know I've made mistakes
Living without you is a curse that I can't take Living without you love hurts
Living without you love that's crazy
So save me, from falling to the depths without no safety
Don't leave me hanging by a thread I don't know my place
Living without you is a curse that I can't take
I know I've made mistakes
Living without you is a curse that I can't take
