

# Prima Donna

## Chester Bay

There's a little girl that I know about  
You wanna quote me then you can  
Cuz she's so fine, all the time  
I'm hoping some day she can be just mine  
I gotta tell you son  
You gotta know all about this one  
She can lay it down, she'll pass it around  
If you hit right she'll have you walking on the ceiling tonight  
Oh, she's a prima donna  
She rolling chocolate smoking marijuana  
Always wanted more  
There's a forty in the backseat I pull over  
So she pulling out the bottle giv'n back to me  
She got the faded look in her smile  
I tell her to lay down for a while  
But what'd she say  
She says it's ok  
This cocaine's gonna keep me awake  
She says it's ok  
This quick lift's gonna give me a fast break  
And this little girl so the story goes  
I saw her hiding in a ditch with only worries and woes  
She loved me full time but hated paying rent  
So I led to my room and told her we'd see where things went  
Now she's running from enemies hiding from felonies  
Dancing for pennies for pills for pain  
She may not be all the things that you wanna be  
But I could never see another woman lying next to me  
She got the faded look in her smile  
I tell her to lay down for a while  
But what'd she say  
She says it's ok  
This cocaine's gonna keep me awake  
She says it's ok  
This quick lift's gonna give me a fast break  
She wanna line up that company  
We here a quiet song on the radio but still she screams  
It's ok!  
This cocaine's gonna keep me awake  
She says it's ok  
This quick lift's gonna give me a fast break  
She says it's ok  
This cocaine's gonna keep me awake  
She says it's ok  
This quick lift's gonna give me a fast break  
Oh, she's a prima donna  
She rolling chocolate smoking marijuana  
Always wanted more

There's a forty in the backseat I pull over  
Now she pulling out the bottle giv'n back to meShe got the faded look, got that faded look in her smile  
I tell her to lay down, baby lay down for a while  
She got the faded look, got that faded look in her smileOh, she's all the things that I wanna see and  
I could never see another woman next to me
