

# Run to the Sun

## N\*E\*R\*D

Thinking about the time we share  
And how I wasn't there  
It hurt me  
These people overwork me  
Then I heard maybe soon you'll leave  
Excuse me lord if you have tricks up your sleeve  
I'm not ready to be bereaved  
I know I'm always asking for something  
Or another  
But this time, it's just time  
'Cause I love her  
But baby if he don't change his mind  
Or fate or time  
Yo I want to leave you with this line

### Chorus

It goes while you're here  
I want to tell you something  
It's that I love you girl  
Yeah, and I wish we could run to the sun  
And never come back  
Yeah

Yesterday I tied two rocks together  
That symbolize our lives  
And threw them in the ocean  
Now they're on the ocean floor coastin'  
'Til they stop rollin' so far  
That no sonar would list them  
To the point that no one would even believe that we existed  
I know that may sound twisted  
But my neglect is killin' me  
I feel so guilty  
Please have faith in if you feel me

[Chorus: Repeat 2X]

Though you're probably feelin' blue  
And you'll do what you must do  
I hope you know

I'd hand the skies to you  
I'm so embarrassed for mankind  
They have the nerve to let their weapon shine  
They're so stupid  
Do they not know you're about to fly high  
Away  
With the wings that god will give you someday  
I'm not jealous  
I just can't take it  
S.O.S. to your ears, the only thing I ever feared was this day  
And having to say

[Chorus:]
