Get Set for Sound

The Stereo

hey, get set for the brand new sound
it perfect in every way
unlike any before youe found
at least that what wee told to say
hey, wee smarter than that don you know
but you counted the heads so hit play
and assume what you don really know
now there something that we like to say
it easy to make up
it not hard to fake
watch how they do it to me
this is serious... it a big mistake
hey, i grew up with the sound around
spent my summers just listening
with no reason to turn it down
i would listen
now, i've grown up and i understand
target us with a marketing plan
but theye seemed to forgotten why
the music a lie when the target tried
what have we done?
what have we created?
what does this mean?
and how are we gonna make it now?
