

# When the Fire Goes Out

## Distant Sun

I don't want to talk about it but I've gotta get it off my mind  
It feels like we're drifting and I don't know the reasons why  
I thought I put a lot in to it but it's all been lost in time  
I need to know, I need to know, I need to know, I need to know what's happening inside Everybody knows that  
when the fire goes out it's out forever  
Take me back again to when it all burnt out so I'll remember  
What caused my love for you to die  
November's cold and so am I It's 5 o'clock on Sunday morning and our bed is cold like snow  
You up and left without a warning as the rain crept down my window  
I can't explain what's happening but I think I'm letting go  
I tell you now, I tell you now, I tell you now, I tell you now, I didn't want to let it show though Everybody  
knows that when the fire goes out it's out forever  
Take me back again to when it all burnt out so I'll remember  
What caused my love for you to die  
November's cold and so am I The road ahead it may be lonely but it's the only road I need  
and I know what is in front of me is a future of uncertainty  
but I've turned the page and now it's over and I need you all to see  
that I did the things I had to do to try and get it through to you but now I'm breaking free Everybody knows that  
when the fire goes out it's out forever  
Take me back again to when it all burnt out so I'll remember  
What caused my love for you to die  
November's cold and so am I  
November's cold and so am I
