Hand Grenade

Tu Fawning

Baby's got blue eyes and she's wanting to stay
But I am running out of time with nothing to say
So it's that kinda night when the beers all gone
Now I'm all alone, man there's something wrong
And this is not the first time and I'm sorry to say
But when it comes to pretty girls I fall apart on the way
So it's that kinda night when the beers all gone
And now I'm all alone, man there's something wrong
And if you don't believe me
Watch and I will make it happen
If you wanna see me fall apart again
But if it's gonna be this way, here I come
Save the day
And while I'm at it throw a hand grenade
On everything good around, here to stay
To make a mess of all the plans we made
And everything good around here
'Cause if you wanna see me
See me out the door girl
I need you to believe me
'Cause I don't wanna hurt you
If you really need me
I'm only gonna let you down
I've seen this a thousand times and I've been here before
Now I'm afraid to blink my eyes and end up outside your door
So I think that I might, while the going's gone
Play it all alone, man there's something wrong.
And If you don't believe me
Watch and I will make it happen
If you wanna see me fall apart again
But if it's gonna be this way, here I come to
Save the day
And while I'm at it throw a hand grenade
On everything good around
Here to stay
To make a mess of all the plans we made
And everything good around here
'Cause if you wanna see me
See me out the door girl

I need you to believe me
'Cause I don't wanna hurt you
If you really need me
I'm only gonna let you down
And if you get too close I'm gonna hurt you
I can't trust you, I'm never gonna come through
If you get too close I'm gonna hurt you
I can't trust you, I'm never gonna come through
Here I come to save the day
Save the day
And while I'm at it throw a hand grenade
On everything good around, here to stay
To make a mess of all the plans we made
And everything good around here
'Cause if you wanna see me
See me out the door girl
I need you to believe me
'Cause I don't wanna hurt you
If you really need me
I'm only gonna let you down
