...Not Forever

Tsunami Bomb

I thought that this was solid
Stability and safety sitting in my hang
Just take a look at your life
You're all alone!
Who'll be there when I need someone?
Count on nobody and no one will let you down
I don't care, just let me go
I don't need this anymore
Love is not forever
Friendship is not forever
There is nothing set in stone
You're on your own
Dependence is followed by weakness
Don't be your own hostage
If I know so many
Why don't they know me?
They don't know me
Now I know what we're made of
Confusion, Complication, and Uncertainty
I thought this was real, I was wrong
So I don't know
