Look Up

Daley

I know, I know, I know
That you're not happy here
You don't need to say (yeah)
It shows, it shows, it shows
It's all over your face
You can't erase it (no)I wish that we could face
The things that hold us back
Before we fade to black (yeah)
Instead we chose to change
The things we know won't last
There's so much we lack
But something keeps me hanging me on
Yes, some feelings they never go so...
Look upAnd if the stars should fall from the sky
I will put them all back in time
So you know that when they shine
They shine for you
Oh, whoa, oh yes they do
They do (they do)Those words that we don't say
They make the biggest sounds
They call us out (call us out)
'Cause they're acquired truths in vain
And we both feel them now
But still, we love somehow (oh)
I wish that we could face
The things that hold us back
Before we fade to black (yeah)
Instead we chose to change
The things we know won't last (don't ever last)
But something keeps me hanging on
Yes, some feelings just never go so...
Look upAnd if the stars should fall from the sky
I will put them all back in time
So you know that when they shine
They shine for you
Oh, whoa, oh yes they do
They do, believe meI love you in my way
Oh, what more can in say
It's constant as the stars

Although we're lost in space
So, if separate ways we go
I hope somehow you know
Whatever circumstance
You will be in my soul (will be in my soul, in my soul)
In my soulAnd if the stars should fall from the sky
I will put them all back in time
So you know that when they shine
They shine for you
Oh, whoa, oh yes they do
