

Last Night I Dreamed

Blues Traveler

It's the part of the dream
That leaves me when the sunlight hits my eyes
It's the part of the dream
That rolls me over and over as I sleep
It's the part of the dream
That leaves me wanting for the darkness
It's the part of the dream
I can't remember it at all I dreamed about you last night
I dreamed about you last night
I dreamed about you last night
Last night I dreamed Last night, last night Something about a big jet plane moving fast off into the sunset
Maybe a Mustang moving fast up to the sky
More like a great big boat drifting off to nowhere
I know that in the end I was waiting on the other side I dreamed about you last night
I dreamed about you last night
I dreamed about you last night
Last night I dreamed Huh
Last night, last night I can feel the dream long before it makes my mind
I know the dream like the scent at the evening air
I need the dream to keep me safe until the morning
When I open my eyes you are there I dreamed about you last night
I dreamed about you last night
I dreamed about you last night
Last night I dreamed Oh, I dreamed about you last night
I dreamed about you last night
I dreamed about you last night
Last night I dreamed
