Run It Back Again

Corbin Bleu

Yeah!Lookin back wishin you could rewind
Changin every wrong to right that you see
If you could dont you think that you would
Make your world just like you want it to be?Now its never too late, theres a will, theres a way
Gotta stay in the game, go the distance
Cause you live and you learn that it takes a lot of work
But you win in the end with persistence, oh!Mix it up, get it right, go for another try
You still run it back again
Replay, hit rewind, this time youll do it right
Til you run it back againRun it back again, run it back again, try againNever wait around cause every minute counts
If you had the time what would you do with it?
What would you change? Tell me, what would rearrange?
If you got the puzzle right, how would the pieces fit?Now its never too late, theres a will, theres a way
You can save the day like a hero
Cause you live and you learn that it takes a lot of work
Hopin nothins gonna stop you, oh no, go go!Mix it up, get it right, go for another try
You still run it back again
Replay, hit rewind, this time youll do it right
Til you run it back again
Run it back again!On your mark, get set, lets go!
Aw, you can make it happen if you want it to
Tick tock, time to rock, you know
The futures up to youOne more time nowMix it up, get it right, go for another try
You still run it back again
Replay, hit rewind, this time youll do it right
Til you run it back againMix it up, get it right, go for another try
You still run it back again
Replay, hit rewind, this time youll do it right
Til you run it back again
Run it back again!
