

American Lady

Suzi Quatro

American lady
Good old American child
American lady
Good old American child

I've been around every single town, London to Tokyo
I've seen the world from inside out
And what i want to know
Where did all those good times go
Where can we play our rock 'n' roll
I am going home again
Stateside is where i'm bound

American lady
Good old American child
American lady
Your arms are open so wide
I want you, America
I need you, America
I miss, America

Left to find a golden rainbow
I flew across the sea
We would play staccato ballads
My band of boys and me
Now I've got everything i wanted
But there's one thing more
I hear them calling me
And I'm coming home

American lady
Good old American child
I hear you calling wildly
And I'm coming home
Home to, America
I need you, America
I miss, America

I want you, America
I need you, America

I miss, America
I want you, America
I need you, America
I miss, America
I want you, America
I need you, America
I miss, America
I want you, America
I need you, America
I miss, America
