## Anyway

## **Alphaville**

Welcome or should I say goodbye It's a question how close we are apart Are you going back home after this show Or leaving for the wild? And when you're passing the wardrobe What will you take? You worn out hat of hopes Or someone else's attractive furs to make it through The playgrounds of your lifeAll is shown, all shut down All the world is gone All the pieces came together Finally but not too lateAll is shown, all shut down All the world is gone Just pretend that I'm not there Make your choice, I love you anyway I love you anywayI love you anyway Just make your choice Pretend that I'm not there All the world is gone All the world is goneJust take it, just take it And then you'll make it alright, yeah Ride on, ride on All is shown, all shut down All the world is gone All the pieces came together Finally but not too lateAll is shown, all shut down All the world is gone Just pretend that I'm not there Make your choice, I love you anyway I love you, love you anyway
