It's Not Possible

Awkword

It's not possible
you said the words yourself and i feel nothing but ashamed
we're still holding out
this catalyst of doubt and all i ever get is the blametake me away
take me away to where i want to be
tell the world that im not listening
turn it off for lack of reason
different faces, places that i can't explainIt's not possible
but damn it would be nice
if i could take away the past
It's not possible
no matter what the price
count on me to finish lasttake me away
take me away to where i want to be
take me away
take me away to where i want to be
tell the world that im not listening
turn it off for lack of reason
different faces, places that i can't explain
all these years think its time i faced it
once again the best iv'e tasted
my insulation keeps me here again
my only friendIt's not possible
borederline illogical
but who are you to realy say
it's not possible
borderline illogical
I don't reallt want to wake[repeats chorus]
