Been to the Moon

Corinne Bailey Rae

[Corinne]
When we first collide
The timing wasn't right
I showed you the signs
You disappeared into the shadows
Now you're back again
Telling me you do, you do
Don't you recognize
A fellow astronaut?
We've been here before
Our movements are elliptical
When you move towards me
You make me lose my cool
It's cruel...I've been to the moon don't tempt me
I've been where you are, God help me
I've been to the moon and stars for you
When I was yours and you go for me tooYou weren't a spark then
Light of galaxy
It's not enough for me
If you're really man about it
Show me something real
Prove to me you're true, I do, ohI've been to the moon don't tempt me
I've been where you are, God help me
I've been to the moon and stars for you
When I was yours and you go for me tooSo help me, what's the golden rule?
Somebody better let me know
What's the golden rule?
Gone too far, can't hide my heart
Why won't you just show me what to do?
Oh, I love you, I want you
It's such a long way up to the moon
I've been to the moon and the stars for you
You, you, I know that, I know that, yours to proveI've been to the moon don't tempt me
I've been where you are, God help me
I've been to the moon and stars for you
When I was yours and you go for me tooI've been to the moon so gently
I've been where you are, God help me
I've been to the moon and stars for you
When I was yours just to prove that you're true...
