Under Siege

Thy Majestie

Down in the valley of dragon I see
Thousands of soldiers without the face
They are running they are full of hateIn just one moment all castle they surround
Screaming the song of battle
Catapults standing by the order to fire
The calm before the stormFew temerarious were guarding the door
They are the soldiers chosen by king
Who wants pass through them all has to face 'emRed sun is setting the charge now begins
Arrows in flame by the skies
The field 'round the castle is painted with blood
With blood we'll wash this gesture[Chorus]
Under siege it's really the moment to fight agin
And we'll give you the soul 'till the end
New day shall be the victory day!
Under siege it's really the moment to fight agin
And we'll give you the soul 'till the end
New day shall be the victory day!"Hoc insigni regio libertatis regem te nomino.
Regia potestas tibi a summa data est
Ut has terras servitute fame atque bellis liberare posses".[Chorus]
Under siege it's really the moment to fight agin
And we'll give you the soul 'till the end
New day shall be the victory day!
Under siege it's really the moment to fight agin
And we'll give you the soul 'till the end
New day shall be the victory day![Chorus]
Under siege it's really the moment to fight agin
And we'll give you the soul 'till the end
New day shall be the victory day!
Under siege it's really the moment to fight agin
And we'll give you the soul 'till the end
New day shall be the victory day!
