## **Shadows On The Barley**

## **Marillion**

Storm clouds cruising cross the blue skies
Shadows float across the fields of barley
I find myself an island in an island
I have to sort things out just my wayAnd all I find is my bar

To laugh, to me I say

Like all you know is true

Is for every time we know it's mineI saw clouds cruise floating cross the blue sky Shadows float across the fields of barley

Hero down the right way

Everything will come out my wayNow I know, I see, I find

It's the only way I ever felt the way I do today

All I say, I play the game

I know I never could be sure of all the places that I've seenClouds cruising cross the blue skies Shadows float across the fields of barley

> Every self an island in an island Working every problem out my wayNow I see, I feel, I know

It's the only way that anything could sort out to the way

I say you'll find it's out of mind
It's the only way I could have been
It's the only way I standClouds cruise
Float upon the barley
