

Dream Machines

Big Deal

We don't ask for much
Just what was promised us
We don't want the world
Just a house and a little girl
Why I moved to France
Nothing here was built to last
What you want and what you chose
You can't have both
You can't have both
I've been dreaming of dropping out
Will it matter if I'm around?
If you want to tell me now
I've been dreaming of dropping out
All we need is light
What's mine is yours and yours is mine
And we got it right
No one taught us how to fight
What you want and what you chose
You can't have both
You can't have both
I've been dreaming of dropping out
Will it matter if I'm around?
If you're scared to tell me now
I've been dreaming of dropping out
We'll grow our hair
Cut our ties
Grow our hair
Cut our ties
Grow our hair
Cut our ties
Grow our hair
