Animal

Thirteen Senses

I lost my control today
Something came and ate it away
Tears trickle down your face
As quickly as it comes, it escapesNow you, you'll never get this far off the ground
Throwing all designs where you're found
You'll never get that far from me now
And darling, just take one more look aroundScience made us skin and bone
Turn us into earth and stone
Time it takes to fade away
Is time enough to find a place?Now you, you'll never get this far off the ground
Throwing all designs where you're found
You'll never get that far from me now
And darling, just take one more look aroundAnd I, I can't decide if I'm prepared to fight
Your eyes they come alive
At night, so you can fight
Like an animal, like an animalLike an animal
Like an animal
