Too Many Enemies

Chilliwack

Enemy lies cut you down to size
You're hypnotized, who's the bad guy now?
Keep it up, keep it up, keep it upI got too many enemies and not enough friends
I may call on your help before we reach the end
I can't look out my window, can't look out my door
I don't think I like this anymore, no, no, noEnemy lies cut you down to size
You're hypnotized, who's the bad guy now?
Keep it up, keep it up, keep it up, keep it upI got too many enemies and not enough friends
Seems like everybody's touchy, everything offends
Boarded up my windows, double lock upon my door
They really can't complain about me anymore, no, no, noToo many enemies and not enough friends
Too many enemies and not enough friends
Too many enemies and not enough friends
Too many enemies and not enough friendsToo many enemies and not enough friends
Too many enemies and not enough friends
Too many enemies and not enough friends
Too many enemies and not enough friends
