

# One More Time

## April Wine

(myles goodwyn)

Published by northern goody two tunes, ltd./capac - ascap The man in the back smokes a pack and a half

Sayin "one more time before we go"

The lady in the front wants to roll with the punches

Just one more shot and then she'll know

Everybody's feelin' alright

Runners on an endless flight, so high One more time before we go

One more song on the radio

One more time before we go

One more song on the radio The pretty boys stand just as close as they can

Silhouetting lovers, such a sight

Nobody stares, hey why should they care

You are what you are tonight

Tomorrow we could all fade away

They only wanna live for today, so high One more time before we go

One more song on the radio

One more time before we go

One more song on the radio

One more time The world may be comin' apart

The confusion they're feelin' comes straight from the heart

All they know is the need that they have to be free

So let 'em, just let 'em be The world may be comin' apart

The confusion they're feelin' comes straight from the heart

All they know is the need that they have to be free

So let 'em, just let 'em be The smoke gets thicker as the night goes on

Shadows dancing through the haze

So outrageous, it's a sonic affair

Only doing as they please

You'll never hear a word about heaven

Or what they'd have to do to fly, so high One more time before we go

One more song on the radio

One more time before we go

One more song on the radio

One more time, yeah, before we go

One more song on the radio

One more time before we go

One more song on the radio

One more time
