Jacob & Mandragora - Perfect Drug

Tom Froon

I would see visions of where they've been, I saw visions
Of mesepotamia saw ancient wars it feels like literally ten thousands
Watts Of electricity going over my whole body
I am literally more high at that point than i've ever been
And i hear a voice speak over my head you said,
I will make you more high than all the drug addicts and i will make them jealous of how high i get you
And i am just in utter disbelief and shock like everything in my life had just been washed clean
And i mean I didn't say any fancy prayer I didn't like you know read the bible or anything like that
It was just i got basically struck by lightning by a god I didn't even believe in

Perfect Drug
Umm, I've been genuinely searching for the meaning of life
Throughout my childhood like uh we dont tried to find the perfect drug preety much
