

Girls on Film

Duran Duran

See them walking hand in hand across the bridge at midnight
Heads turning as the lights flashin' out, it's so bright
Then walk right out to the four line track
There's a camera rollin' on her back, on her back
And I sense the rhythm hummin' in a frenzy all the way down her spine
Girls on film, girls on film
Girls on film, girls on film
Lipstick cherry all over the lens as she's falling
In miles of sharp blue water comin' in where she lies
The diving man's comin' up for air
'Cause the crowd all love pulling Dolly by the hair, by the hair
And she wonders how she ever got here as she goes under again
Girls on film, girls on film
(Two minutes later)
Girls on film, girls on film
(Got your picture)
Wider baby, smiling, you just made a million
Fuses pumping live, heat twisting out on a wire
Take one last glimpse into the night
I'm touching close, I'm holding bright, holding tight
Give me shudders in a whisper take me up till I'm shooting a star
Girls on film, girls on film
(She's more than a lady)
Girls on film, girls on film
(Two minutes later)
Girls on film, girls on film
(See you together)
Girls on film, girls on film
(See you later)
Girls on film
