Make It Right

Ace Troubleshooter

Won't make do with your games
And your slamming the door
So fall down, fall through
So have done with your vice and your virtueIt will take a lot to make it right
It will take a lot to make it right
It will take a lot to make it rightPrattle with your voice and it's sounding off
Sounding like white noise
If we fall, divide, if it's yours to choose
Then go and decide
'Cause if it's mine, I won't let it rideIt will take a lot to make it right
It will take a lot to make it right
It will take a lot to make it right
It will take a lot to make it right
It will take a lot to make itDidn't I stay and didn't you wait?
And didn't I care when you were crying?
Didn't I stay and didn't you wait?
And didn't I care when you were crying?It will take a lot to make it right
It will take a lot to make it right
It will take a lot to make it right
It will take a lot to make it right
It will take a lot to make it right
Make it right, make it right, make it right
