

Light in the Dark

Strings Of Atlas

Artist: Strings of Atlas

Writer/composer: Atlas Cage

Song: Light in the Dark

Album: In a better worldYou can only see the light

When it's dark outside so don't

Let it get you down

The world only looks for the things its lost so you

Wait til you're found

And somewhere along that dusty road you went and

Found yourself a friend

And you can put em in your pocket baby

So you have someone in the end

Oh, I feel it coming on again

Alright, we'll be alright in the endThe fires only warm when it's cold outside so don't

Worry about the frost

And just because you wander baby it don't

Mean that you're lost

And somewhere along that open road you found a

Bit about yourself

And you can take those demons baby

And put em up on a shelfOh, I feel it coming on again

Alright, we'll be alright in the endOh, I feel it coming on again

Alright, we'll be alright in the endI hear the sun is falling down

The cities sink into the ground

But we're alright. Were alrightI hear the sun is falling down

The cities sink into the ground

But we're alright. Were alrightI hear the sun is falling down

The cities sink into the ground

But we're alright. Were alrightI hear the sun is falling down

The cities sink into the ground

But we're alright. Were alrightWhere have all the good times gone

How come no one's moving on

Wasn't it the future yesterday?Fighting for humanity

When there is nothing left in me

Who the hell has got my head today!You can only see the light when it's dark out
