

Whatever Happened

O.a.r. (of A Revolution)

Tell me I'm dreaming
My feet are stone and my light is dim
Chasing this demon on his way down But whatever happened?
Whatever happened? Spent the night out on a hill
And watched the world sleep sound and still
And over mountains darkness spilled
Washed me over Whatever happened?
Whatever happened? Its been a long way back
From the edge of that
Saw the world from a hill
And right back where it started
And it still feels right
Like the very first time
Saw the world like a kid
Yesterday is over,
Lets write another story tonight! City gates of rusted iron
Can't contain the light inside
So I spot this devil at the county line,
And went no further And whatever happened?
Whatever happened? Its been a long way back
From the edge of that
Saw the world from a hill
And right back where it started
And it still feels right
Like the very first time
Saw the world like a kid
Yesterday is over,
Lets write another story tonight! After all the time is gone,
I'll have moved on Its been a long way back
From the edge of that
When the world was a kid
And right back where it started
And it still feels right
Like the very first night
Saw the world like a kid,
Lets write another story tonight! I saw the world from a hill,
Lets write another story tonight! I saw the world like a kid,
Lets write another story,
Write another story tonight!
