Science Fiction

French Miami

It's just like science fiction
Who knows what the fuck they're talking about
There's always one in every crowd
There is always one in every crowd
You can hear the voices when you're alone
They sound like metal on metal
Obnoxious and loud
Don't let go
Don't listen to the sound
Of those people you know
Slowly falling apart
And falling down now
Everything is falling down now
When I think I'm alone
I'll watch the news on my girlfriend's TV
It's like a bad B movie
Oh, sometimes I can't comprehend
All the stupid things that I see
So don't let go
If you can't believe your eyes

Yeah, when everything they show you
Just makes you wanna cry
And you don't wanna know
That you need to remember
Life is always getting better
So don't let go
There is always one in every crowd
Yeah, you see them when you think you're alone
It all just seems like science fiction
No one knows what they are talking about
So don't let go
Don't listen to the sound
Of those people you know
Slowly falling apart
And falling down now
You need to remember
Life is always getting better
Life is always getting better

Life is always getting better for a while
