

# Written In The Stars

## Blackmore's Night

Once written in the stars  
A pathway set in stone  
A candle in the night  
To guide your way back home  
Then somewhere in your memory  
Calling from afar  
It's daring you to see  
What it is that's written in the stars  
Once written in the stars  
A pathway set in stone  
A candle in the night  
To guide your way back home  
Then somewhere in your memory  
Calling from afar  
It's daring you to see  
What it is that's written in the stars

You said that you would stay  
And that you'd never leave  
I gave you all I had  
When I chose to believe  
Love like magic casts a spell  
Sometimes leaving scars  
I guess it's just as well  
Not to know what's written in the stars  
Still written in the stars  
And written in your eyes  
The prophecy fulfills  
The dream that never dies  
A shooting star lights up the night  
While the earth stands still  
And somehow we lose sight  
While following what's written in the stars  
I want to know what's written in the stars  
Please tell me what is written in the stars
