# Space Seed

## S.P.O.C.K

It's an unknown fact to you
Why humans look the way they do
And not like the cavemen you once wereAges ago we came to Earth
Carried out our holy mission
Developing you to something new
Space seed, new breed
We improve the human race with our space seedSpace seed, new breed
We will help the human race with our space seed
We are the guardians of the galaxy
Preserving life and its mystery
We are behind what your scientists call "The Missing Link"Now you can be sure there are E.T:s out there
The thing we've done to you we've been doing everywhere
And we'll do it again and again and again
Space seed, new breed
We improve the human race with our space seedSpace seed, new breed
We will help the human race with our space seed
Now you are misusing your inheritance
You'd better start to behave; there won't be a second chance
But do it now before it gets too late
Or disintegration will be your fate
Space seed, new breed
We improve the human race with our space seedSpace seed, new breed
We will help the human race with our space seed
