Play Me

Level 42

I must say you're really something else
The way you're tearing down my house
And I know you'd never stoop so low
As to rebuild it somewhere else
You know how to play me
Everybody knows you can handle me, play me
Nothing can compare with what I've found today
It hasn't always been this good
I haven't always loved you like I should
But it's really something else
I love you like I never thought I could
You got to play me
Everybody knows I been woman handled, play me
Nothing can compare with what I've found today
Been out on my own
For too many years
You came not a day too soon
I was out of my mind
You swallowed my pride
And dried all my tears
Gone is the only tune
I sang
You really know
You really know how to
You really know how to play me
All the women of my dreams
Were the kind who lived beyond my means
But I know you'd never stoop so low
Your love is always what it seems
You got to play me
Everybody knows I've been woman handled, play me
Nothing can compare with what I've found today
Here in the night, it's a shot in the dark
For sure that's a chance I'll take one day at a time
A feeling so right, it's a walk in the park
It's so easy to make or break, she sang so easy
Suis reste seul
Pour trop longtemps
Vide de coeur

Vide de sens
Tu es arrivee
Secher mes larmes
Reconforte, je te regarde
