Do You Believe In Heaven

Andreas Johnson

If I could stay here a million years
If I could climb into your tree
Will you be around to watch my fears
And to let our love grow free?If I could be there when all ends meet
If I knew where to begin
Will we ever find the gold we seek?
It's so hard to look withinI wanna wake up in the city light
To reach out for the country side
And be there with love be there to be the someone
Somewhere down the road to whisperDo you believe in heaven?If I could disappear from where I came
If I could see not to be seen
Will you be around to wear my name?
Will you be around for me?I wanna wake up in the city steam
To reach out to where I've never been
And be there with love be there to be the someone
Somewhere down the road to whisperDo you believe in heaven?
Do you believe at all?
Do you believe in heaven?
Do you believe in love?I wanna wake up in the city light
To reach out for the country side
And be there with love be there with
LoveI sleep to drift away
For you I find a place to stay
And be there with love be there to be the someone
Somewhere down the line to whisperDo you believe in heaven?
