

Into the Sun

Agnes

We walk the streets, we follow light
 I follow you
You take me on, you lead the night
 I stick to you
You hear my heart, won't beat ahead
 You draw me in
You take the night, one step ahead
 You let me in
 Out of the fire
 and into the sun
 we are drowning
 in the bright light
 Out of the fire
 and into the sun
 we are dancing
 'till the night dies
 Out of the fire
 and into the sun
 we are blinded
 by the big lights
 Out of the fire
 and into the sun
 we are dancing
 in the sunrise
We leave the streets, we fly away
 too high to reach
We walk alone from here to way
 way out of reach
I hear the sound from deep within
 one beat ahead
We're closing in, I see the edge
 one step ahead
 Out of the fire
 and into the sun
 we are drowning
 in the bright light
 Out of the fire
 and into the sun
 we are dancing

'till the night dies
Out of the fire
and into the sun
we are blinded
by the big lights
Out of the fire
and into the sun
we are dancing
in the sunrise
We are starlight, black sky lit up
We are starlight, black sky lit up
We are starlight, black sky lit up
We are starlight, black sky lit up
Out of the fire
and into the sun
we are drowning
in the bright light
Out of the fire
and into the sun
we are dancing
'till the night dies
Out of the fire
and into the sun
we are blinded
by the big lights
Out of the fire
and into the sun
we are dancing
in the sunrise
