

Hey Last Beautiful

Guano Apes

We got to hold our hands against the fire.
I have to save the last best desire.
Who's gonna bring back all the fantasy,
When there is no way out for you and me? Hey last beautiful,
I will miss you so.
And hey last wonderful,
Did we lose your soul? Wish you'd live forever,
So we could dream this together.
I will build another world for you.
It's the only thing I have to do. Somewhere we'll find a place
Where the good things last,
And you don't need look back.
I will build another world for you.
It's the only thing I have to do.
I will build another world for you.
The only thing I'd do
To you my beautiful.
I see you last beautiful. Oh, hey last wonderful,
Can you make us fly?
Although we've been bad
And just ate this world out
You saved our lives so many times. Hey last beautiful,
I will miss you so.
I see the plants we destroyed
And the wars we never thought
We would fight again. And hey
last wonderful,
Let me take you by the hand
Although we've been bad
And just ate this world out
You saved our lives so many times.
I look at the joy and tears
we shared together
When our dreams were full of light.
