

You Can't Hide

Sanctus Real

When you're feeling all alone
And you've got no friends on the phone
When you've reached your all time low
He'll be around In your car, in the starts
He's everywhere you are
He's alive and He'll always find you
When you're down He's around and He knows Of all the places you can go
You will never be alone
Of all the places you could find
There is nowhere you can hide When you think you've escaped
He's right beside you
When you sleep, when you wake
In the midst of your heartbreaks
He is there and he knows Of all the places you could go
You will never be alone
Of all the places you could find
There is nowhere you can hide Make no mistake, He'll be around
Make no mistake, He's all be around
Make no mistake, He's all be around
Make no mistake, He's all be around, round Of all the places you can go
You will never be alone
Of all the places you could find
There is nowhere you can hide When you're feeling all alone
And you've got no friends on the phone
When you've reached your all time low
He'll be around
