

# Whitey's Theme

## Superdrag

There's not an answer  
Expecting nothing impromptu  
I was the cancer but something  
Cures me when you do me And if you don't know by now  
I'm never gonna show you how  
And if you don't know by now  
I'm never gonna show you how  
Or let you out of me I like the places the way you're lacing them with me  
I dig the spaces 'cause there's a grace there I can see  
And if you don't know by now Truest love, you are my intoxicating wish  
So much more to live for than my fist  
If I want to breathe with you  
Close my eyes and let you see right through  
That's a scary thing to do  
It's the very thing I do, it's the very thing I do Put me on a supersonic trip  
Every time you wake me with your lips  
If I want to bleed with you  
Close my mouth and tell you that I do  
The truest lies are few, the truest lies are few  
But the truest love is you
