When You Fall in Love

Andrew Ripp

It's been a long time coming, baby
And I know it's right
Even a heartbreak couldn't take love from you and IHere I am
I'm ready
Just say when[Chorus]
When you fall in love
You lose control
You can't hang on and you can't let go
When you find the one
You hold on tight
You weather every storm
Till the sun shines
Even when it hurts, there's no regret
Every breath you give, is one you get
When you fall in loveWhen you fall in loveIt even rains in the summertime, honey
But I'll keep you dry
Plenty of room under my umbrella
For your brown eyesAnd all I see
is you and me, baby tonight[Chorus]
When you fall in love
You lose control
You can't hang on and you can't let go
When you find the one
You hold on tight
You weather every storm
Till the sun shines
Even when it hurts, there's no regret
Every breath you give, is another one you getYou'll drive all night
Cause you don't wanna miss even one little kiss
and you couldn't sleep anywayWhen you fall in love
When you fall in love[Chorus]
When you fall in love
You lose control
You can't hang on and you can't let go
When you find the one
You hold on tight
You weather every storm
Till the sun shines
Even when it hurts, there's no regret

Every breath you give, is another one you get
When you fall in loveYou wake up livin' in a dream
Strong enough to show you're weak
Flying high with broken wings
When you fall in love
When you fall in love
