Phased

Flow

After laughing at the stars
The time arrives to coincide with all the chaos
And the sparks of when two worlds collide
And it's been hours now feels like dayWe've been hours now in these waves
We've been phased, we've been alchemized
Melted, liquefied and dried and left to crystallize
And it's been hours now, feels like daysWe've been hours now in these waves
We've been phased
