

Herojuana

NOFX

Light the match, burn the flower
Leave behind, all the wrong, why be sad?
When happiness can be bought for a little more then free
Modern day prohibitionAre we men? Are we children?
At what age, can I choose how to live?The only real drug problem is scoring real good drugs
Haven't we learned our lesson?
The corner store sells finer scotch
But who's got uncut powder?We just want what is ours dignity
If God created plants, and plants that I find and abuse
Then who the fuck are you to judge me?
