# Asteroids

## David Amo & Julio Navas

A million miles away
We can run, we can be lost in space
Counting down from ten
With a spark we can start our life again
Who says we can't fly, fly away
Who says we can't run, run away...
With the asteroids!
Writing off our friends
All alone we are lost again
Writing off our pain, cause we run, run away...
With the asteroids!
Please don't you ever crash, or or fly or stay in space
Please don't you ever crash, or or try and save the day
Away and away and you watch me
Touch down, I won't stay
Away and away and you want me...to stay
Counting down the days

We can run, we can be lost in space
Falling off the end
With a spark we can start our life again
Who says we can't fly, fly away
Who says we can't run, run away...
With the asteroids!
Please don't you ever crash, or or fly or stay in space
Please don't you ever crash, or or try and save the day
Away and away and you watch me
Touch down, I won't stay
Away and away and you want me...but I cannot stay!!
Release my wings, please cut these strings
So I can fly, and fly, and fly...away
She says she wants me to stay
She says she wants me to stay
She says she wants me to stay
She says she wants me...
