Way Back Home

Starsailor

Be still my child, we'll overcome The evil mind behind the bomb So lift your hearts, open your minds And leave no room for words unkind Be still my friends, we'll overcome The evil mind behind that bomb You don't waste your words, I've already grown I'm gonna find my way back home Don't waste your words, I've already grown I'm gonna find my way back home Be still my friends, we'll overcome The evil mind behind that bomb Don't waste your words, I've already grown I'm gonna find my way back home Don't waste your words, I've already grown I'm gonna find my way back home Don't waste your words, I've already grown I'm gonna find my way back home Don't waste your words, I've already grown And I'm gonna find my way back home Way back home, way back home My way back home
