

# Trippy Star

## Bad Love Junkie

Twinkle twinkle trippy star  
Yes I know who you are  
You're my black hole  
The last flash  
My super nova burning out  
And I know what I'm talking about  
Yes I know cause I've been down there before  
When it all came crashing down on my head  
My house of cards fell like a ten ton  
A ten ton load of bricks  
You buried me in this prison  
I've been digging out inch by inch  
And now here you come again tempting me  
With that unattainable high  
Trippy trippy trippy star  
Stay right where you are  
I don't want you  
I don't need you  
Hanging round fucking up my scene  
I've been stoned  
But I'm sober now  
I've been stone cold  
But now I'm hotter than hell  
When it all came crashing down on my head  
My house of cards fell like a ten ton  
A ten ton load of bricks  
You buried me in this prison  
I've been digging out inch by inch  
And now here you come again tempting me  
With that unattainable unsustainable high
