

Lady Love Me

The Watson Twins

Give me that hand
No I meant the other one
I'd like to hold it much better
There's the scars from before Then there's those bruises
You still have on your arm
It just builds character
Makes me wanna know you that much more Oh lady
Lady love me
Oh lady
Lady love me
That's what he says
In the morning
When in the night
We forget And the spirit led you my way
There's no other way it could've happened
In more places are forgotten
When nothing else matters
But just two
He and you Oh lady
Lady love me
Oh lady
Lady love me
That's what he says
In the morning
When in the night
It ain't right
He forgets
