Now

Chicago

If there's something you want to say then say it now
If there's someone you want to love then love them now
You don't want to miss all this
'Cause it would be the biggest mistake of your life to never tryIf there's a song you wanna sing then sing it now
If there's a life you want to live then live it now
'Cause it'll be gone, hold on
Don't you let your second chances get away, don't wait'Cause now
This is the time we must start living in
Let's make a change while it's not too late
Let's make a place where love is happening
The world is going by
There's no greater time than nowIf there's someone who needs a hand then give it now
If there's someone you want to teach then show them how
Just show 'em the light inside
The one that shows us how tomorrow's gonna be
Plant a seed
