Still Be Here

Hundred Reasons

To ponder the worst in doubt
To pick up where we left off
Without thinking too loudWhen birthdays came around
I waited for you to be there
Just for onceOne day you surprised me
Then you walk away
But I will never be the same, yeah
When you walk away
I will always careMost of what we have
Is to forget the time gone by
We should let it goTo move it forward, will I
Have to forgive mistakes
And just be glad?But one day you surprised me
And then you walk away
But I will never be the same, yeah
And when you walk away
I will always care, always careAnd when you would see me now
We dust off the severed senses
And pull things so closely now
It does not matterIt does not matterAnd then you walk away
But I will still be here, yeah
And when you walk away
I will always care, always care
Always care
