Fallen star

CJ Stone

You happened, what the words are meant to be
Your very own best and me.
On every cover of the magazine
Your looks remain the same.
Now let me show you what is all about
You took the pill now spit it out
If that reduce that's a life to pay
Well listen me.
You're what they call a fallen star
The brightest light I've known so far
Illuminate this world, you are
My fallen star.
You're what they call a fallen star
The brightest light I've seen so far
Illuminate this world, you are
My fallen star.
Remember life won't treat you well
Just take a time and reinvent yourself
It's up to you when it's well achieved
As long as you believe.
Now let me show you what is all about
You took the pill now spit it out
If that reduce that's a life to pay
Well listen me.
You're what they call a fallen star
The brightest light I've known so far
Illuminate this world, you are
My fallen star.
Everywhere you are, my fallen star,
My fallen star.
No matter where you are,
My fallen star.
You're what they call a fallen star
The brightest light I've known so far
Illuminate this world, you are
My fallen star.
My fallen star.
My fallen star.
Everywhere you are, my fallen star,

My fallen star.
