

Sick

Sam Sparro

Darling your brow is wet, you've got a fever
Darling rest your head, I'll make you a believer
Baby come away from the window, I don't want you to see it
The things that you might see you won't want to repeat it It's a sick, sick world, I'll be your medicine
Come and take me, take me, I'll make you feel better When your mother bore you, boy did she adore you?
She wanted to protect you from the world she brought you into
But your curiosities took you by the arm
Make sure you take me with you when you go into the unknown It's a sick, sick world, I'll be your medicine
So come and take me, take me, I'll make you feel better
It's a sick, sick world, I'll be your medicine
Just come and take me, take me, I'll make you feel better Darling you've got a fever
I'll make it better
I'll make it better It's a sick, sick world, I'll be your medicine
Just come and take me, take me, I'll make you feel better
Oh, it's a sick, sick world, I'll be your medicine
Just come and take me, take me, I'll make you feel better
Better, better, better, better I'll make it better
I'll make it better
I'll make it better
I'll make it better
I'll make it better
