Lighting the Way

Superdrag

I've been lighting the way
With bridges burning low now
I've been wasting the days
Like living's going out of style nowI've been up every night
Walking down the highway
If I can make things right
I'm gonna do it my waySend it straight to you
Like you put a price on everything you do
Like a song that ain't worth singingI've been hiding away
Waiting for disaster
I regret the delay
I wish I could've healed up fasterI've been up every night
Walking down the highway
If I can make things right
I'm gonna do it my waySend it straight to you
Like you put a price on everything you do
Like a song that ain't worth singing
A thought that ain't worth thinking
I've gotta find something worth bringing back to youSend it straight to you
Like you put a price on everything you do
Like a song that ain't worth singing
A thought that ain't worth thinking
I've gotta find something worth bringing back to you
To youIf I can make things right
I'm gonna do it my way
If I can make things right
I'm gonna do it my wayIf I can make things right
If I can make things right
If I can make things right
If I can make things rightIf I can make things right
If I can make things right
If I can make things right
