

# Danger

## Scream Out Loud

It's been four years since i have seen your face  
And still i can't get you out of my head  
But i remember the time when you said we're just best friends

Can someone please save me from this constant nightmare  
Cause i don't know how much of this that i can take  
You call me pathetic but you won't call me to say hi  
You never do

Say the things you know i need to hear  
Just let it all come  
I'll let it all come down

Cause when the music stops the rest is silent  
And looking back i never thought i would be what i am today  
I think it's time we get this straight  
I'll cross my fingers and pray to God to somehow remove you from my mind  
So i can move on with my life

Say the things you know i need to hear  
Just let it all come  
I'll let it all come down

This is the danger  
And you were it  
This is the danger  
This is it

Say the things you know i need to hear  
Just let it all come  
I'll let it all come down

Please tell me i'm not alone in this world
