

One Thing About Waves

dEUS

Waves

You know we come in Waves
We're rolling on the tide
Like a tear in your eye
One thing about Waves
And how the mood can change
Like a wind on a fire
We've been here for so long
And It counts for you and I
From a ripple into the sky
We're the very first stage coming
The very first stage in the life cycle of waves

You know we come in waves
As we need the days
As we move through the night
Wind and water
Gliding water
You are the limit of yourself
You are the sickness and the health

And It counts for you and I
From a ripple into the sky

Wind and water
Gliding water
You are the undertow above
You are the hatred and the love
And It counts for you and I
From a ripple into the sky
We're the very first stage coming
The very first stage in the life cycle of?

You feel it in the undertow
Nothing can ever stop the flow
I guess it's just the way it goes
Some will make it and some will break it in
Waves
You know we come in Waves
We're moving on the tide

Like a tear in your eye

We've been here for so long

We've been here for so long

We've been here for so long
